

Murphy Company

Sutherlin, OR (LVL)

Produce structural wood products audited and certified in accordance with APA's Quality Management System (QMS) Program. APA certification is not available to producers of hardwood/decorative plywood, particleboard or medium density fiberboard (MDF).

The APA member mill referenced above, in conjunction with the respective quality audit program, manufacture LVL that:

- Is made with adhesives that contain no added urea-formaldehyde resin
- Meets APA Product Specification E-720 G5 grade for formaldehyde resin
- Meets the Japanese Agriculture Standard (JAS) F☆☆☆☆ Formaldehyde limits

As such, products produced at this mill, and certified by APA, are exempt from the California Air Resources Board (CARB) Airborne Toxic Control Measure (ATCM) to Reduce Formaldehyde Emissions from Composite Wood Products (California ATCM 93120), and are also exempt from the scope of the EPA Toxic Substance Control Act (TSCA) Title VI Formaldehyde Standards from Composite Wood Products Act.

A handwritten signature in dark ink, appearing to read "Charles E. Hartke", is positioned above a horizontal line.
